Voluntary youth work organisations are key players supporting and developing young people across Scotland. Through their effort, activities and commitment they are able to transform the lives of young people and support them to progress positively.

Youth Scotland recognises the vital role these organisations play and we are working with the Social Enterprise Academy to deliver a programme which will build the skills of senior managers and leaders within these organisations.

You will work with peers from across Scotland to consider key strategic questions facing the sector, your organisation and identify opportunities. This programme will allow you to invest time in identifying and developing your leadership strengths as you take forward your organisation.
